Sign-Off Date	Wednesday 6 May 2026
Sign-Off Time	10:30
Declaration	Non-compliant demo response. Rectification or follow-up is required.

Inspector Observations and Suggestions

Generated non-compliant demo report using local assets.

Gas Installation Hazards and Compliance

Gas Safety (Gas Installation) Regulations 2018 — Part 3, Division 3, Section 21

If a gasfitter finds a dangerous defect in a gas installation, they must act immediately to make it safe and notify the property owner and occupier. If it's not possible or reasonable for the gasfitter to fix the issue themselves, they must promptly notify Energy Safe Victoria. They must also inform:

- the gas distribution company if the installation uses natural gas, or
- the gas retailer if the installation uses LPG.

This ensures that any hazardous situation is reported and addressed quickly, keeping the property safe and compliant.

Declaration and Certification

This gas compliance report summarises the inspection findings and certifies that the attending technician has performed the required checks and recommendations recorded below.

- AS 4575 Gas installations
- AS 3786:2014 Gas appliances
- Residential Tenancies Regulations 2021

I certify that this inspection has been conducted by a qualified inspector and the information contained in this report is true and accurate to the best of my knowledge at the time of inspection.

Inspector Certification:

Inspector Name:
Demo Technician
Date: Wednesday 6 May 2026

Next Compliance Schedule

Next Inspection Date	Saturday 6 May 2028
Regulations	This gas safety check has been completed in line with the Residential Tenancies Regulations 2021 and AS/NZS 5601.1: Gas Installations. It confirms appliances, pipework, and ventilation are operating safely and documents any defects that require corrective action.
